Yes, but the call for panel members is a public event as well.

Looks like we don't need to do much right now - process of getting to public release is a while. First we ask SAB to do review, then they call for people to serve on panel, then they announce panelists and date for review. THEN it goes out for public comment, about 60 days before panel review. ORD estimated the report actually going public in March. So now it's up to ORD to get that ball rolling.

Wow, this is a big step. It will get the WOUS conversation all stirred up again. I have reached out to comm director for ORD to coordinate and make sure we take advantage of this release.

Obviously my WOUS planning was still coming together but it is good to have a driver to force action and kick things off.
